December 2003

Dear Friends,

Yet another year has provided us with the opportunity to financially support our fellow Christian Scientists seeking healing and regeneration by spiritual means alone. Individuals supported by the Christian Science Nursing Care Endowment, along with their Christian Science nurses and practitioners, are joining others on the leading edge of healing in the movement. How essential is this work? Consider non-Science relatives witnessing healing of their parents or grandparents through Christian Science treatment. Consider also the alternative, had that family member been forced into a medical model against their will simply because their Christian Science care was not financially feasible.

The Endowment's financial support has allowed these students of Christian Science to hold fast to the only therapeutical treatment they have known, and the only system of therapeutics there really is—the revelation of Truth! Watching dedicated, lifelong Christian Scientists demonstrate their spiritual individuality through the practical demonstration of Mrs. Eddy's system of treatment of sickness and disease adds their works to the many "bugle calls" of our movement. We have been privileged to follow their progress and the wonderful work being done by Christian Science nurses in facilities as well as in patient's homes.

Thus you can imagine how grateful we are for the metaphysical and financial support of churches, associations, and individuals. About \$46,000 has been given for nursing care this year alone and since our inception over \$400,000 has been provided to fellow Christian Scientists in Southern California. The Endowment, has now reached \$1,668,000. That amount may seem impressive but as an endowment, we preserve all contributions permanently and use only the earnings to support this work. As a result, we are able to meet only a portion of the amounts requested. Therefore we need your continued support if we are to insure that no dedicated Christian Scientist is deprived of Christian Science nursing for financial reasons.

Whether through your individual giving or through action you inspire at Church membership meetings, please know how grateful these individuals are who have felt your love and support. Your support is a forever gift, blessing generations to come.

The enclosed booklet is a gift for those who are trying to make sense of the confusing and ever-changing kinds of health insurance available and whether they are adapted to the special needs of Christian Scientists. Although the Endowment Board takes no position on this question, the booklet may help those interested in health insurance answer questions and assess provisions for Christian Science nursing and care.

With love,

R. Barry Walson
